- 5. Import and Export

SECTION 1 - Role Purpose

This guide is for Inventory Management. It explains only the daily work this role normally needs to perform in OMMS.

Important Note: Use the master manual for full details

This short guide is for fast training. For complete system understanding, read the Master OMMS Training Manual.

Inventory users maintain the list of sites and media units that can be sold and executed.

SECTION 2 - Create Site

- Enter clear site name.
- Enter city, area, and landmark.
- Select media type.
- Add dimensions and photos.
- Set availability status.
- Save media units.

SECTION 3 - GPS Strategy

Latitude and longitude are optional during site creation. OMMS can lock real GPS from the first verified POE.

Best Practice: Use real field proof

The most reliable coordinate is usually captured by the field staff at the actual site.

SECTION 4 - Avoid Mistakes

- Search before creating a new site.
- Do not use vague names.
- Do not mark damaged or unavailable sites as available.
- Keep photos current.

SECTION 5 - Import and Export

- Use CSV import preview before creating records.
- Review invalid rows and duplicates.
- Export inventory for audits or sales planning.
