

Mobile App Quick Start Guide

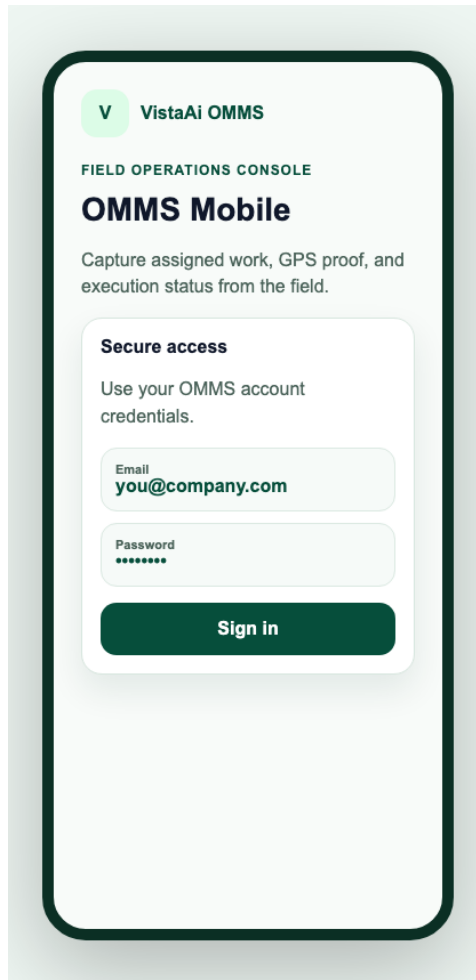

Quick start for the OMMS mobile operations companion, including login, assigned work, POE upload, status, alerts, and admin summary.

Audience	Field staff, operations leads, and mobile admins
Updated	May 20, 2026
System	OMMS Outdoor Media Management System

This guide reflects the current OMMS SaaS web platform and mobile operations companion: white and forest green UI, operational intelligence, role dashboards, alerts, imports/exports, POE review, billing risk, and system diagnostics.

How to use this guide

Use the screenshots as orientation, then follow the workflow sections in order. OMMS is role-aware, so users may see a smaller dashboard than the admin examples shown here.

A screenshot of a mobile application interface for 'VistaAi OMMS'. The screen is titled 'FIELD OPERATIONS CONSOLE' and 'OMMS Mobile'. Below the title, it says 'Capture assigned work, GPS proof, and execution status from the field.' There is a section titled 'Secure access' with the instruction 'Use your OMMS account credentials.' Below this, there are two input fields: 'Email' with the text 'you@company.com' and 'Password' with a masked password '*****'. At the bottom of the form is a green button labeled 'Sign in'.

Secure mobile sign-in.

Submit proof

Field POE upload with GPS and photo readiness.

Mobile admin high-level operations summary.

First login

Use the OMMS account issued by your admin. The mobile app uses the same operational terminology as the web platform and shows role-appropriate information.

Field users see assigned work and POE tasks. Admin users may see compact campaign, POE SLA, billing risk, alert, and system status summaries.

Assigned work and POE upload

- Open assigned work and confirm campaign/site details.
- Capture or select proof media.
- Wait for GPS ready status where available.
- Submit proof and watch upload progress.
- Follow rework or rejection instructions if operations sends them back.

Status and environment modes

If the platform is in maintenance or read-only mode, mobile shows the status and blocks risky submissions until operations reopens write access.

Operational checklist

- Keep the app updated and location permissions enabled.
- Confirm site details before submitting proof.
- Do not expose finance or admin screenshots to field-only users.
- Contact operations if upload retry repeatedly fails.
